# INVEST IN A SERIES III GRAIN COMMANDER

*A Tradition in Excellence*

Situated in the southern Western Australia Commander Ag-Quip has emerged at the leading edge of the industry producing one of the most sought after augers on the market. The name GRAIN COMMANDER is testimony to the confidence farmers have in the auger.

Commander Ag-Quip pride themselves in being a family owned Australian business committed to providing farmers with the latest in innovative design, high quality manufacturing, complete technical design service and backup for the entire range.

Our design service team have affiliations with many companies around the world. This has lead to a compilation of concepts and ideas resulting in the name "Commander Ag-Quip".

The GRAIN COMMANDER range of augers offers reliable efficient and trouble free operation. Operator safety has been considered in the design but not at the expense of practicality or efficiency. Only top quality Australian recognized parts are used.

## GRAIN COMMANDER AUGER FEATURES

- Cupped edge flighting for better pickup.
