*Town & Country Fencing Systems*

## The easy fencing solution.

**NO WELDING**

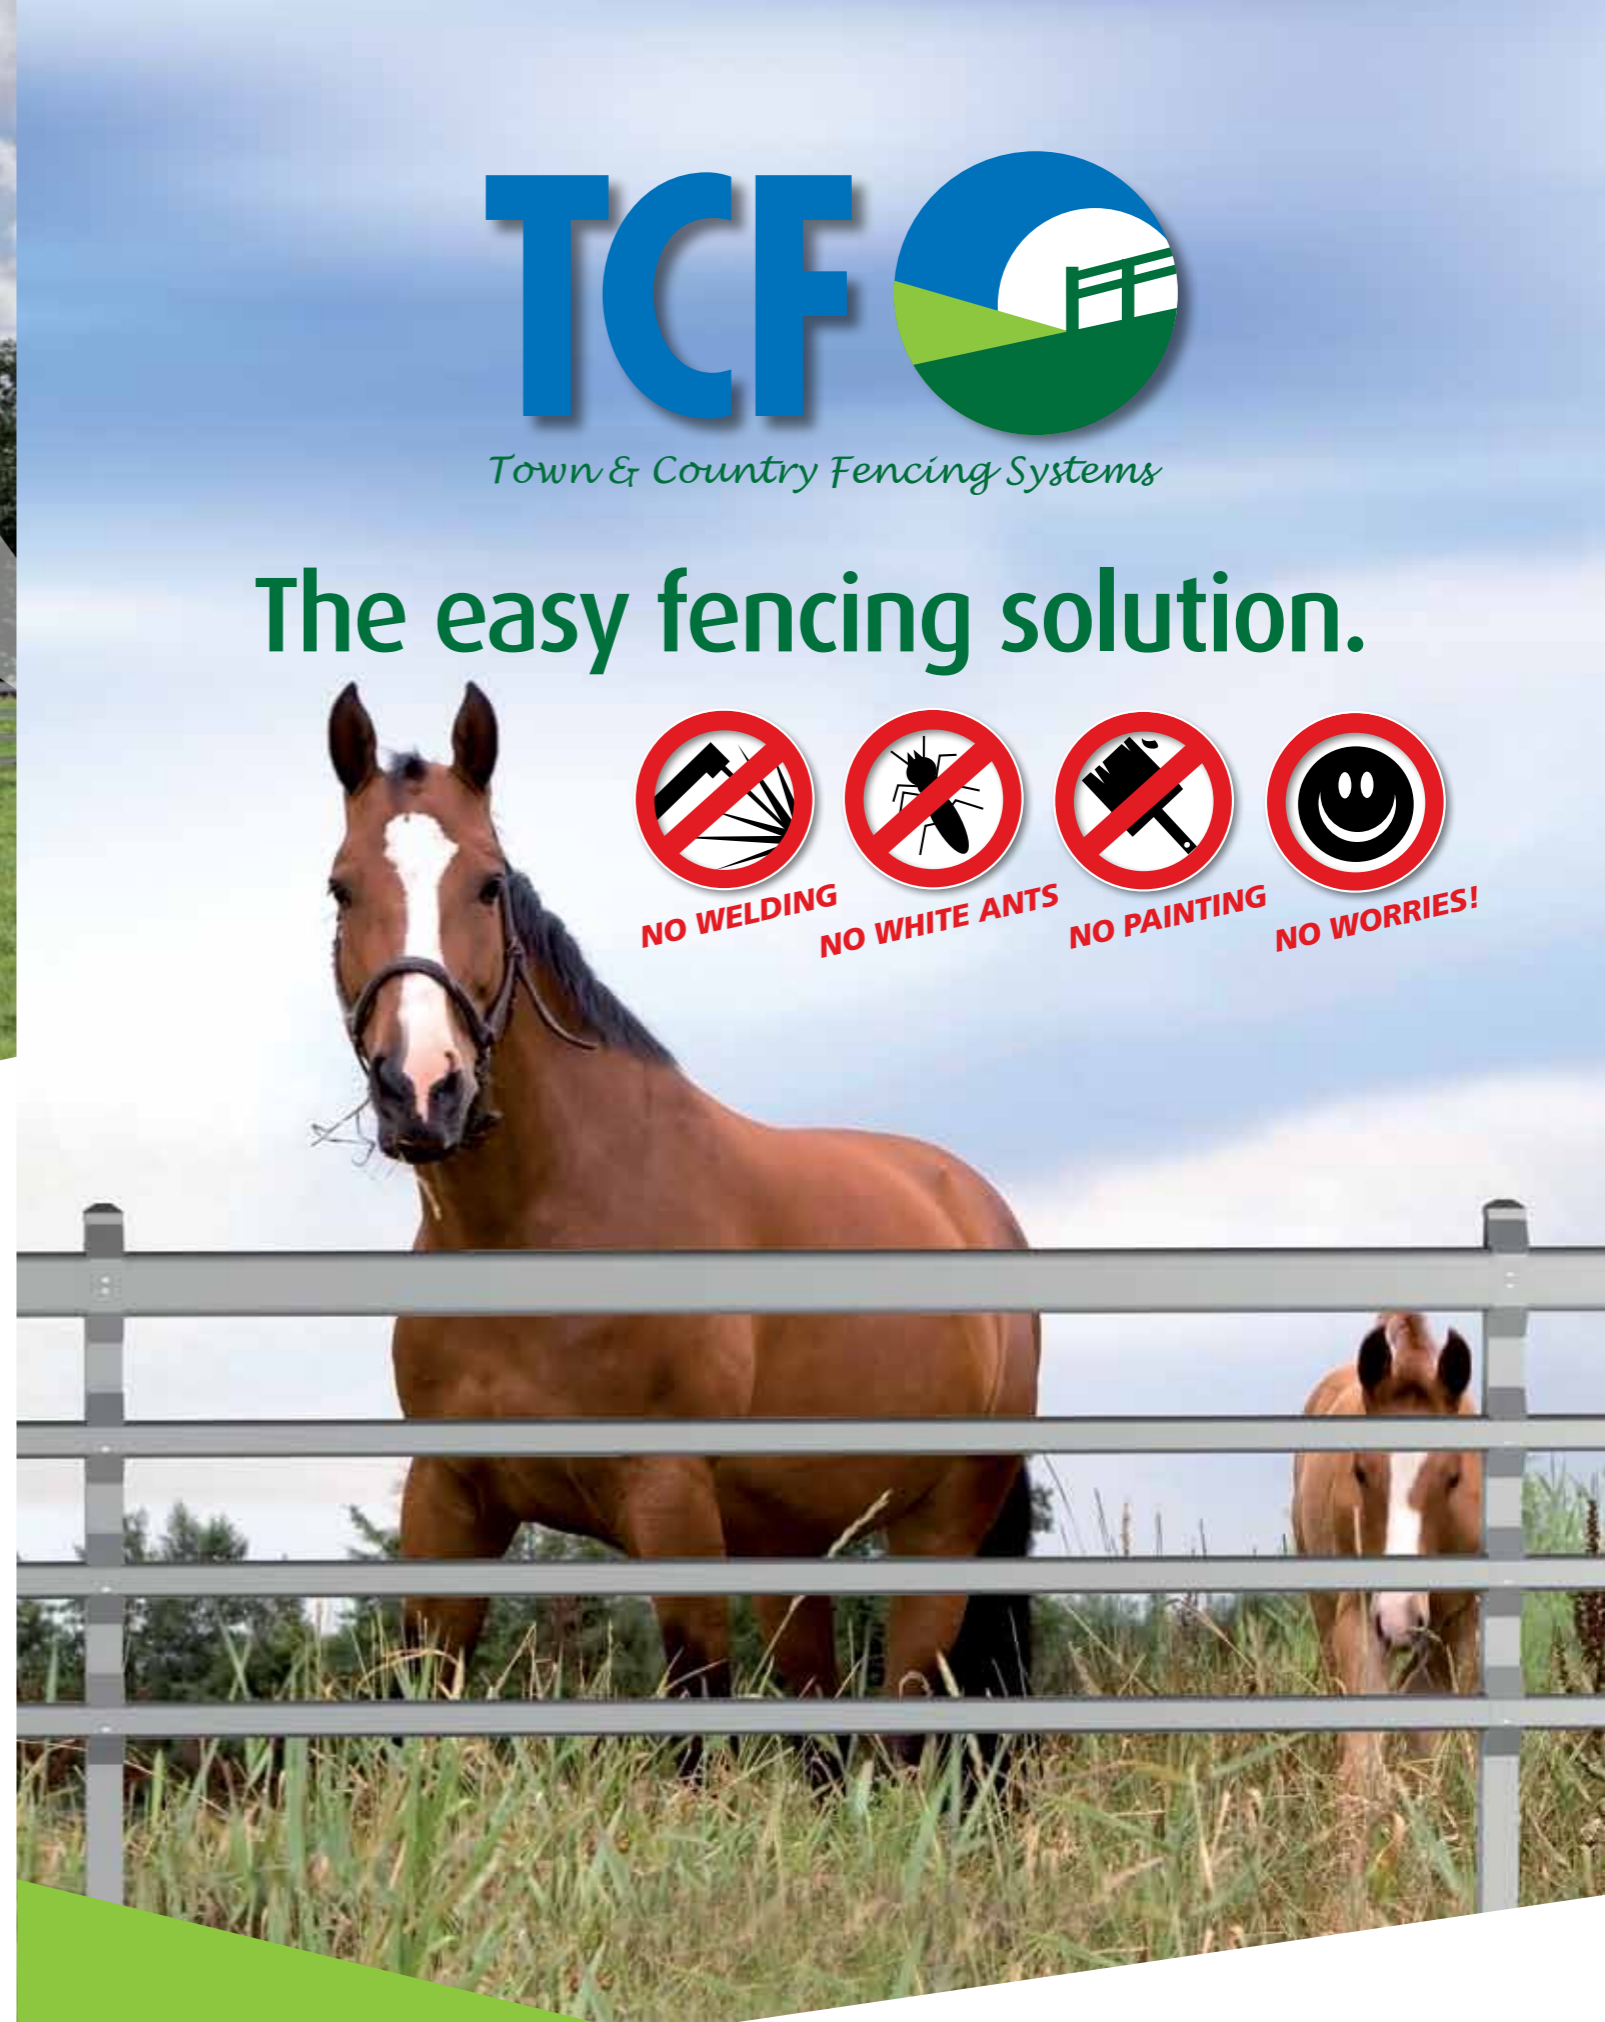

**NO WHITE ANTS**

**NO PAINTING**

**NO WORRIES!**

# Simple and professional

Finally a fencing system that offers the simple solution to a wide variety of fencing applications. Combined with the flexibility of the TCF Fencing System components, each fence style can be modified to suit the job at hand and constructed with ease!

The TCF fencing system (town & country fencing) is an all new fencing system that suits a very wide range of situations. For rural, residential and industrial applications.

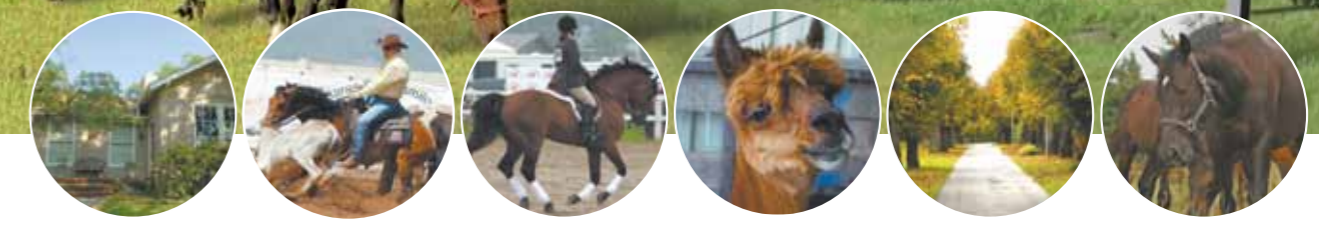

Variable post length and rail spacing provides flexibility, along with unlimited combinations of wire, wire mesh, cable or electric wire options. This enables the system to be tailored to each individual's needs or requirements.

TCF consists of 65x65mm RHS posts varying rail sizes, and a series of patented galvanised brackets. This enables the whole fence to be erected quickly and simply using 8mm livestock friendly tech screws - no welding required!

Call 1800 655 033 for an obligation free quote and to find your nearest stockist .

## Why use TCF for your next fencing job?

- No welding
- Unlimited rail spacing options
- Can have combination of rail, wire, wire mesh, cable or electric wire
- Ideal for horse stalls, cattle yards, paddock fences, house paddocks etc.
- Livestock friendly screws
- Easy to erect
- Economical
- No painting
- TCF Fencing is cost effective
- TCF is white ant resistant
- TCF can be powder coated to your colour scheme
- TCF is fire proof
- All goes together using 8mm tech screws - so simple!

RESIDENTIAL    RODEO & DRESSAGE ARENAS    LIVESTOCK    ENTRANCES    STABLES

## TCF fencing can be used for so many applications including:

- Horse fences
- House paddock fencing
- Entrance gates
- Stables
- Livestock Yards
- Arenas
- Parks and gardens
- Culvert fencing
- Safety fences
- Ranch style boundary fences
- Residential house fencing
- Rodeo complexes

The system has been developed with the concept of simplicity and ease of erection in mind. With the cost of labour on the increase this offers the opportunity for the "do it yourself" person to put up a fence that looks every bit professional.
